

## **Robots, Humans and Relations!** *- Worth a read!*

It was moment of pride for the school when a short story- Robots, Humans and Relations, written by Amanvir Singh of class 8D, was published at [www.bribooks.com](http://www.bribooks.com) on 23 April 2023. The story is a journey of human race and technology in the form of robots.

The story takes us on a ride through varied emotions. It also talks about how one gets addicted to technology and depends on robots for their work. The time we spend with these robots often leads us to missing out on making amazing memories with our family. How it becomes too late for us to change our path after

losing our loved ones is a difficult realization.

Amanvir is a programmer himself who enjoys working with technology. His favorite book is the series of Diary of a wimpy kid.

The management and Principal congratulated Amanvir Singh on his accomplishment and expressed their support to any student who wishes to explore such opportunities.
