

An orientation programme was conducted to the students of classes 6 to 12 (ECO CLUB) on 16.07.2016 on the title

“VOLUNTEER FOR INDIA AND HER ENVIRONMENT WITH EFI.”

EFI is a platform for concerned citizens to volunteer and be the solution to India's environmental problems. Their projects range from scientific lake restoration, herbal plantation to mass awareness through street theater.

Resource persons from EFI were Mr.ARJUN & Mr.SURYA. They gave a very involving power point presentation about their organization, their projects and motivated students to be a volunteer for environment. They also sensitized about the various career options for class 11 & 12 like environment economics, environment management, environment technology etc., there are internships provided to students on research and communication. They also award certificates which will improve their profile.

They are providing a platform for all like-minded student nation builders. They asked to form representatives from each class and start being a part of lake restoration programmes. This was a very motivating orientation making India greener and safer for all life forms.

Incharge teachers: B.NAGAVEENA & R.MALLESHWARI
