# A WEBINAR ON
ARTIFICIAL INTELLIGENCE

KIPS organization conducted a webinar on 'Artificial Intelligence' on 29/05/2021 and is attended by School's IT Dept. It was truly an informative and interactive one. The resource persons familiarised us with a few educational resources such as virtual lab software and so on which are simulative and innovative for the students.

They threw light on the usage and applications of AI in major areas such as:

- ✓ **Disaster Management**
- ✓ **Land Mapping and Survey**
- ✓ **Mining**
- ✓ **Space Exploration**
- ✓ **Heavy Industrial Units**
- ✓ **Medicine**

The interesting fact is that AI is being used even in locating garbage in various locations.
