

REPORT ON VIRTUAL TOUR

CLASSES - I, II & III

Trips and tours break the monotony of the classroom and provide multisensory experiences for students. So, to eradicate boredom and enhance their observational skills while comfortably sitting at home, we planned different virtual tours for different classes. Students of classes I, II & III enjoyed the spectacular virtual tours and gained knowledge about various places. They answered a questionnaire after the visit which aimed at analyzing how students' conceptions evolved with regard to the particular topic.
