

## FIELDTRIP

### "Zoo-minto Fun! Step into Nature" Playground"

A zoo is a place where many kinds of animals, birds, and reptiles are kept in enclosures for people to see. The school has organized a field trip to Nehru Zoological Park for students of Class IV on 26<sup>th</sup>

December.

The weather was perfect for a day out and the zoo was bustling with visitors eager to witness the beauty

of wildlife. Children were greeted by the serene environment filled with the sounds of birds and rustling leaves. Children saw a diverse range of animals including deer, peacocks, monkeys, and one of the highlights of the visit was observing the majestic Bengal tigers in their spacious

enclosures. They could see a

variety of birds like parrots , peacocks ,  
emu and cranes. They were amazed to  
see different varieties of deer, antelopes,

including black bucks, a rare Indian variety while having a ride in the toy train and enjoyed a lot. They came across and observed how long the giraffes were and how big the elephants seemed. Visiting a zoo was both enjoyable and educational, giving a deeper appreciation for wildlife and the need to preserve natural beauty and diversity of wild life which was a **remarkable** experience for students.
