

FIELD TRIP REPORT

A JOURNEY INTO NATURE

Grade I Explores the Botanical Garden

Date: Friday, 17 July 2026

"Nature is the best classroom, and every leaf has a lesson to teach."

The Grade I students embarked on a delightful and enriching educational excursion to the Botanical Garden, Kondapur, where learning came alive amidst the wonders of nature. The visit offered young learners an opportunity to experience the beauty and diversity of the natural world beyond the confines of the classroom.

The students explored an impressive variety of trees, flowering plants, medicinal herbs, the vibrant Butterfly Garden, and beautifully landscaped green spaces. Through these firsthand experiences, they developed a deeper understanding of biodiversity, the importance of environmental conservation, and the need to protect our planet's rich natural heritage.

One of the highlights of the visit was the captivating snake show, which fascinated the students and helped dispel common myths while creating awareness about these remarkable reptiles. The children also thoroughly enjoyed spending time on the play and recreation to the educational outing.

The excursion fostered curiosity, observation, and appreciation for nature while creating joyful memories that will be cherished for years to come. It was a meaningful learning experience that inspired the students to become more mindful and responsible stewards of the environment.
