

NURSERY AND LKG ORANGE DAY SPECIAL ASSEMBLY

"Orange—the colour of joy, energy, warmth, and creativity—filled the campus with vibrant smiles and boundless enthusiasm."

The Pre-Primary Wing of DDMS (AMS) P. Obul Reddy Public School celebrated **Orange Day** with great excitement on **24th July 2026**, transforming the learning environment into a vibrant space of colour, creativity, and joyful exploration. The celebration was thoughtfully designed to help Nursery and LKG students recognize and appreciate the significance of the

colour orange through engaging experiential learning activities.

Radiating charm in their bright orange attire, the young learners enthusiastically participated in a variety of interactive games and play-based activities. An attractive display of orange-coloured objects, including oranges, carrots, pumpkins, marigold flowers, butterflies, balloons, and toys, provided meaningful visual stimulation and reinforced colour recognition in an enjoyable manner.

1. Adding to the festive spirit, the teachers captivated the children with a lively action song centred on the colour orange. A simple yet fascinating colour-mixing activity demonstrated how the primary colours, red and yellow, combine to create orange, sparking curiosity and wonder among the little learners. The children eagerly participated, making the experience both memorable and enriching.

The celebration beautifully blended fun with learning, enabling children to associate colours with objects from their everyday surroundings. Such experiential activities play a vital role in strengthening observation skills, language development, cognitive growth, and sensory learning, making the journey of early childhood education both meaningful and delightful.
