

WEEKLY LEARNING PLAN

CLASS: LKG

Week No: 23

Dates: October 31 to November 4 2016

Dear Parent,

BLOCK COMMENTARY

From the desk of **LKG** teachers:

We are going to tell you about the Early Programme lesson on **Magical World Underwater**.

In this lesson, the students will learn about the underwater world and some common **sea animals** that live there.

Students will first look at picture word cards of different sea animals and communicate what they see using familiar words. They will sing a rhyme to learn about underwater sea animals. They will learn about the special features of a fish that help in service.

During **Language time**, students will recognize the form and sound of the letters '**Bb**' and '**Jj**' through stories, rhymes and actions.

During **Maths time**, students will recognize, name, show, trace and write the number '**6**'. They will also name, count and show a collection of 1-6 items using counters and blocks.

Rather than just learning about numbers and their value through rote and memorization, students learn through actions, rhymes, manipulatives such as beads, blocks and playing games like hopscotch and dice games.

At home, you can encourage your child to count the number of things they use at home in their everyday lives, like spoons and bowls while having dinner or their toys or books.
