

WEEKLY LEARNING PLAN

Class: UKG

Week No: 24

Dates: November 7 to November 11 2016

Dear Parent,

BLOCK COMMENTARY

From the desk of **UKG** teachers:

In this lesson, students will understand that machines are used to make work easy. They will learn that machines have changed over time.

Students will experiment on slides and planks to learn how slopes can be used to slide things down and pull things up. They will examine how a see-saw works and can be used to lift things. They will compare machines we see today with those in the past.

During Maths time, students will compare the numbers 1-20. They will identify the order of routines in school and then order in numbers. They will use number cards and number strings to show numbers before, after and in between.

During Language time, students will identify the beginning sounds in words, name things that begin with a blend, make picture cards and write the word for the card. They will describe new words.

Rather than just exploring different kinds of machines, they will apply their learning to put together a machine and further explore it.

At home, your child can be asked to use picture word cards of blends to help him/her read.

It would be great if your child can write words on picture cards, shuffle them and deal to play. The player, who places a card over another with the same beginning blend, wins the hand.

Note: Educational trip: KIDIHOU ON 9TH NOVEMBER,2016

THANKS TO ALL THE GRANDPARENTS WHO MADE THE EVENT A GRAND SUCCESS.

Warm regards,

UKG A-Ms.N.Aruna B: Ms.B.Shailaja C: Ms. Shamina Ramesh

D-Ms. K. Sridevi E- Ms. S. Anupama

Co-Teacher-Ms. Akshara
