

CLASS – UKG
WEEKLY LEARNING PLAN

Week No-33

Dates: 18.01.2017-20.01.2017

Block 24 –LITTLE DISCOVERIES

Block Commentary:

From the desk of the UKG Teachers

Dear Parent,

We are going to tell you about the Early Programme lesson on Little Discoveries.

In this lesson, children will think about, guess and experiment with various things.

Students will experiment with water to explore its shape in different containers. They will use a magnet to check which things stick and which do not. They will explore wet and dry things. Students find out whether the different things can be squeezed or not.

During Language time, students will read a story on CVC words with the vowel 'O'. They will read the words by blending and segmenting them and by sight. Students will match pictures to word cards and then put together words to make sentences.

During Maths time, students begin with backward counting and then play games to take away 1 or 2 from a collection of things. They then use a die to show the number, take away or add the number the die shows when thrown again.

Rather than doing mere subtraction with numbers, the emphasis is on reading pictures and using vocabulary.

During Second Language time, students will learn to identify, read and write Hindi / Telugu letters.

At home children can play the die game. Give them 9 counters and ask them to throw the die. Tell them to show the number using the counters. Let them throw the die again. Have them take away the number on the dice from the counters. Ask them how many are left.
