

DDMS (AMS) P. OBUL REDDY PUBLIC SCHOOL

NCC Air Wing Annual Training Camp

A total of 31 cadets from Grade 9 of DDMS (AMS) P. Obul Reddy Public School participated in the NCC Air Wing Annual Training Camp held at Spoorthy Engineering College, Nadargul, from October 4th to October 12th, 2024. The camp provided an opportunity for cadets to experience a disciplined and structured routine away from their regular school environment. The schedule was packed with various activities, including a Health Run, Drill Sessions, and Theory Classes covering essential knowledge. Additionally, cadets engaged in sports such as football, basketball, and tug-of-war, fostering teamwork and physical fitness.

The training camp also focused on skill development and awareness programs. Cadets received lessons on self-defence from their peers and participated in weapon training sessions. A Traffic Awareness program helped them understand road safety measures, while a session with Red Cross doctors provided valuable health insights. A highlight of the camp was the rare opportunity to see a real aircraft, the Virus SW 80 (Garur), which enhanced their knowledge of aviation. Evenings were spent watching motivational movies, reinforcing positive values and perseverance.

The camp experience proved to be transformative for the students, as they spent nine days away from home, family, and digital distractions. The school's cadets demonstrated their athletic prowess by securing second place in the Girls' Basketball competition. They also showcased their artistic talents during cultural events, where their performances captivated the audience. By the end of the camp, the cadets returned with enhanced confidence, discipline, and camaraderie, making them healthier, happier, and more responsible citizens.
