

CHANDRAYAN to CLASS ROOM

-28th August,2023

DDMS P. Obul Reddy Public School always believes in the holistic and all-round development of the children and it prepares them to face the challenges when they enter into the portals of alma maters.

While the nation is basking in the glory of successful launching of Chandrayan Mission, our school thought of inviting people who are literally behind the screen, to appraise the student fraternity regarding the minute details and foundational components and which are the lifeline of any successful missions.

In this regard, we invited the Founder Director Mr B N Reddy, of Nagasai Precision Engg. Industries Ltd. for an interactive session. This company is supplying the basic components to ISRO from the past 25 years. It supplied hardware parts from Chandrayan to solar mission. Students of Grade XII and X participated in the session with great enthusiasm and were so curious to know the material they used to make the components and how much they weigh and so on. Grade XII students enquired about the internship possibilities.

Mr B N Reddy spoke about his experience and also threw light on the need of studying of Mechanical Engineering, Designing studies etc..

The event ended on a pleasant note and students got the valuable insights from B N Reddy garu and had a clarity about the profession they have to choose!
