

DDMS (AMS) P Obul Reddy Public School

News Letter (Science and Eco Club)

Term I – (Class VI, VII - VIII)- 2019 – 2020

Science and Eco club plays an important role in creating environmental awareness among the future generation.

It is a platform where children get knowledge about environment. It also enables the students to be sensitive towards environmental concern to tackle environmental problems.

In term-I, to promote the values of cleanliness, discipline and respect for environment, we have introduced environmental activities and projects viz. Conservation of Natural resources, Waste production, water pollution, deforestation, Air Pollution.

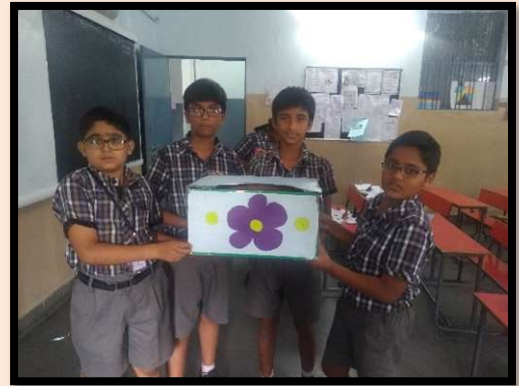

Conductuted activities to educate and sensitize the students about the importance of cleanliness for a healthy, socially responsible, economically dynamic and progressive nation.

Debates and poster making on environmental issues viz. Conservation of Natural resources. Waste production, water pollution, deforestation, Air Pollution.

Students at "HARITHA HARAM" programme planting sapplings in the school and also creating awareness to co students.

Making wealth out of waste: Dustbins with carton boxes

The club aims to mobilize students towards scientific enquiry into environmental problems.

In the forthcoming term we would like to motivate students on how to imbibe habits and lifestyle for minimum waste generation.

We would also want to sensitize the children to minimize use of plastic bags and to promote ethos of conservation of water by minimizing the use of water.

Club Teachers:

Mrs. J V Vijayalakshmi
