

## **FIELD TRIP TO DO SCIENCE CENTRE**

A field trip to Do Science Centre at Sanjeevaiah Park was organized on 14<sup>th</sup> December for students of Classes IV & V to provide hands on learning experience of Science. Around 340 students from classes IV & V visited the park along with their teachers.

Children spend their time reading and focusing on theoretical knowledge while in classroom and Do Science gave them an opportunity to get a feel of practical application of that knowledge.

They explored different exhibits like Defying Gravity, Pulleys, Periscope, Echo Tube, Lift Yourself etc.

Each exhibit has an underlying science principle, was made in such a fashion that they could play without any restriction and learn the concept with the help of the instructors.

The instructors were amicable and demonstrated the exhibits with great insight and passion.

Along with Do Science, students have visited the Herbal Garden to see different plants possessing medicinal value.

They have played for a while in Sanjeevaiah Park which is adjacent to Do Science.

It was an enriching experience for both students and teachers.
