

Report on Field Trip

The school has organized a field trip to Nehru Zoological Park for students of class III on 14 December. A zoo is a place where various birds, animals and reptiles are kept, which we cannot see generally in our surroundings. So, students left the school with great enthusiasm to explore the zoo park.

The first sight after entering was a beautiful and well maintained garden with lots of greenery. Children went around the zoo in the battery operated cars. Different animals have separate well protected enclosures, some were open where as some were closed. There were separate enclosures for birds, animals and reptiles. They were awe struck to find a 100 year old tortoise.

They were excited to watch tigers, lions, jaguars, leopards, elephants, bears, fox, wolves, hippo, giraffe etc. They have learnt many interesting features of these animals.

They came across different varieties of deer, antelopes, including black bucks, a rare Indian variety while having a ride in the toy train.

They could see a variety of birds like parrots, pigeons, peacocks, lovebirds, emu and cranes. They were amazed to see the biggest bird from Africa- Ostrich.

With so much of greenery and different sounds of animals and birds, they felt like walking through the wilderness. It was an enriching and educative experience for children.

They had a great time with their friends and returned with pleasant memories to share with family and friends.
