

## CHANDRAYAN to CLASS ROOM

DDMS P. Obul Reddy Public School always believes in the holistic and all-round development of the children to prepare them to face the challenges when they enter into the portals of alma mater.

While the nation is basking in the glory of successful launching of Chandrayan Mission, the school thought of inviting people who are literally behind the screen so that students can have a feel of fraternity with people involved in the Chandrayan mission. They received an insight into the minute details and foundational components which are the lifeline of a successful mission.

In this connection, we invited the Founder Director of Nagasai Precision Engg. Industries Ltd., Mr B N Reddy for an interactive session. This company has been supplying the basic components to ISRO for 25 years. It has supplied hardware parts to mission Chandrayan to solar mission. Students of Grade XII and X participated in the session with great enthusiasm showing their curiosity to know about the material they used to make the components, how much they weigh and so on. Grade XII students enquired about the internship possibilities.

Mr B N Reddy spoke about his experience and also threw light on the need of studying of Mechanical Engineering, Designing studies etc. The event concluded and students walked back to their class room recounting the valuable insights, shared by Shri B N Reddy, which would help them to consider their career options with clarity
