

EXPERIENTIAL LEARNING

Field trips provide a platform for the students to explore and experience the fun of learning. It enables students to relate the classroom instruction materials with what they see, which in turn facilitates longer retention.

The Class 7 students went on a field trip to the State Museum on 22nd October, Saturday.

The museum has a total of five galleries.

1. Inscription gallery
2. Holy Relic gallery
3. Buddhist Sculptural gallery
4. Ajanta Paintings
5. Devi gallery

In addition to the above, there is also a Canon gallery, Kakatiya Mandapa, a huge wooden chariot and Vijayanagar Mandapa

The students were taken to all the galleries and they enjoyed looking at the various exhibits and took down notes wherever possible. One the students even read from the Holy Quran exhibited in the Holy relic gallery. They were awestruck by the carvings on bronze statues. The inscriptions on the walls brought back memories of their Social Science class.

Each and every gallery was unique in its own way and portrayed our heritage and culture.

On the whole the students were happy with the experience , enjoyed a lot and learnt a lot.

It was a memorable experience.
