

## MATHEMATICS DAY CELEBRATIONS

The mathematics day celebrated on 22nd December marks the birth of Mr. Srinivasa Ramunujan. He is a legendary mathematician who discovered the number theory, infinite series and modular forms. P. Obul Reddy Public School conducted a special assembly addressing how important Maths is in our lives. Making the assembly more fun and interactive the 8th graders sang a song which was a remix of shape of you in a mathematical twist. A dazzling classical dance performance was organized by which the various angles were displayed. A humorous but informative skit was also prepared informing the listeners to know what could be the challenges faced if Maths did not exist. The school also organized competitions related to maths like rangoli making using shapes, poetry on maths and square root spiral. These competitions made the children understand how maths is useful in our daily lives. Thus, saying that the study of maths is just like the Nile river , begins in minuteness but ends with magnificence.
