

CLASS 9 VISITS SCIENCE EXHIBITION @BHAVAN'S

The class 9 students of DDMS P. Obul Reddy Public School went on an educational tour to the Annual Exhibition at Bharatiya Vidya Bhavan's Public School on 15th November 2022 .

The exhibition provided the students an opportunity to learn from their peer group of that school on topics such as the diverse cultures of India, cyber security, natural phenomena and many more. The students also had the opportunity to see large scale machines. They learnt about the diversities of the country and customs in the form of dances and songs. The most interesting topic was the entire concept of air pollution through a nukkad naatak. The English section at the expo introduced new literature by recommending books and documentaries for the students.

The excited students were sincerely grateful for the highly informative experience they had.
