

Pre Primary Science fair

Date: 22-12-22

Day: Thursday

In today's era, education is not only confined to reading and writing. It is now linked to the holistic development of the children.

With this objective a science fair was organized on 22 December 2022 in the school campus by the kindergarten students. The main reason behind organizing the fair was to encourage and inculcate scientific temperament among the students right from the early years of education. The event provided a platform for the tiny tots to explore, discover and showcase their learning through projects and models. This in turn helped children to develop self-confidence, motivation, and team work among students. Children of LKG and UKG displayed their projects in their respective venues and explained to the audience. Few innovative experiments displayed by the children were Highlighter eraser, mixing colors, balloon blow up, parts of plant, Seed germination, life cycle of hen, Walking water etc.
