wisdom lingers

Field-Trip Itinerary

ICE-CREAM FACTORY

5-FEB-2024

“Practical Learning” and “Hand-on experiences” are invaluable in the field of education. They provide students with real-world applications of classroom lessons, which help foster a deeper and better understanding of the concepts. The students of Obul Reddy Public School had a similar experience when they visited the “Snowdrops Ice-cream factory”. This journey offered a unique blend of Entrepreneurship, Science and Technology, and not to forget the delightful treats which made it a perfect destination for an educational exploration.

From the moment of walking into the factory, every step offered them a unique and important lesson. The step-by-step process of production was the first lesson offered by the management of the factory. The students witnessed the transformation of simple ingredients like milk, sugar and fruits into creamy delights. From pasteurization to homogenization and freezing, each stage unveils the science behind creating the perfect scoop. In the process students learned about the role of temperature in control and maintain product quality and the chemistry behind flavor creation. This hand-on encounter bridges the textbook knowledge with real-world applications.

Trip Plan

Distance From School: 24 km

Start Time 08:45 am - Reach Host 10:00 am

Start from Field 01:45 pm - Reach School 02:45 pm

Venue

SnowDrop

Factory Near Aware Global Hospital

At the heart of every successful enterprise lies innovation and entrepreneurship. During the factory tour the students had the chance to meet the top level management of the factory and learn from the experienced the concepts of market, risks, challenges, marketing strategies and many more. They also came across the role of Leadership in the process. No field visit to an Ice cream factory is complete without a delightful treat of those Ice creams, towards the end of the visit the students were given free ice creams.

As the journey can to the end the students who walked into the factory with a strong urge to learn walked out with a ton of new knowledge and smile on their face.
