FIELD TRIP – GRADE 1 AND II

Field trips provide authentic, hands-on, experiential learning opportunities where students can connect what they are learning in classroom in a real-world context. These educational tours are an essential part of the curriculum, allowing students to explore and engage with their interests at their own pace. On October 6th, 2023, Grade I and II students went on a field trip to the Botanical Garden located in Madhapur near the Hi-tech City.

It is a captivating destination with a diverse range of flora. Developed by the Forest Departments, this garden spans 120 acres and consists of 19 sectors, each showcasing different types of plants. The students were guided by the Project Manager, Mr. Suman, who provided insights into various medical plants. Additionally, the garden features a cactus garden and an Environmental Educational Centre equipped with audio and video aids to enhance the children's understanding of the environment.

As part of the trip, the children also had the opportunity to attend a Snake Show, where they thoroughly enjoyed and learned about different types of snakes and received information on safety measures and first aid for snake bites.

The play area is also very good and has slides, swings, see-saw, monkey bars etc., Children enjoyed a lot playing there eagerly waited for their turn. They all left with valuable educational skills and fond memories of the trip.
