

CBSE WORKSHOP

CBSE and NCERT arranged a two-days online training programme for teachers of CBSE-affiliated schools to ensure a smooth transition of instructors and students from old to new textbooks in classes 3 and 6, which were just released.

The training was primarily geared towards the holistic development: in addition to academics, teachers were trained to help students build their character by instilling values, ethics and life skills. Ongoing training helped teachers to explore creative teaching strategies, making lessons more interesting and relevant.
