

EDUCATIONAL FIELD TRIP CONDUCTED FOR CLASSES IX & X

Date: 19 August 2026

Time: 11:00 a.m.

Venue: Artificial Intelligence Human Security Research Foundation (AIHSRF), Dr. MCR HRD Institute,
Road No. 25, Jubilee Hills, Hyderabad

Classes: IX and X

Introduction

An educational field trip to the HRD Institute was organized on 19 August 2026 to provide students with practical exposure to current developments in Artificial Intelligence (AI) and its growing influence on society, governance, technology, and international relations. The main theme of the programme was “The Geopolitics of AI and Advancing Human-Centric AI.”

Objectives of the Visit

The major objectives of the field trip were:

- To understand the growing importance of Artificial Intelligence in the modern world.
- To learn how AI is influencing global politics, economics, security, and international relations.
- To understand the competition among countries for leadership in AI technologies.
- To explore the concept of human-centric AI, this focuses on human values, safety, ethics, inclusion, and well-being.
- To encourage students to think critically about the opportunities and challenges created by AI.

Programme and Learning Experience

During the programme, the participants were introduced to the changing global landscape of Artificial Intelligence. The sessions explained how AI has become an important factor in national development and international competition.

The discussions also highlighted the geopolitical dimensions of AI. AI can influence areas such as economic competitiveness, national security, defence, diplomacy, employment, education, and public administration. The participants learned that responsible cooperation between countries is essential to ensure that AI development benefits humanity rather than creating greater inequality or conflict.

A significant part of the programme focused on human-centric AI. The concept emphasizes developing AI systems that support people and respect human rights, privacy, dignity, fairness, transparency, and accountability. The session emphasized that technological progress should remain connected to human needs and social values.

Conclusion

The educational field trip to AIHSRF was a valuable learning experience that broadened the students' understanding of AI, its global significance and its impact on humanity. Increased awareness of the opportunities and challenges associated with AI and its role in shaping the future of society and the world.
