A Memorable Learning Adventure: Class 4 Two-Day Educational Camp

Our Class 4 students embarked on an exciting two-day educational camp that combined adventure, experiential learning, creativity, and fun. The camp offered a wonderful opportunity to explore new skills, appreciate traditional Indian crafts, develop teamwork, and create lasting memories beyond the classroom.

Day 1: Nature, Adventure and Aqua Fun at Hidden Castle

The first day began with students departing from school and arriving at **Hidden Castle**, ready for an exciting adventure. The day featured thrilling activities such as trekking, zip-lining, commando net climbing, vertical limit, tree-top walking, archery, and the London Bridge challenge. These experiences encouraged students to step out of their comfort zones while developing courage, confidence, coordination, and teamwork.

The adventure sessions were complemented by opportunities for practice and recreation. Students also enjoyed a refreshing rain dance session, making the day a perfect blend of adventure, excitement, and fun.

Day 2: Discovering Traditional Crafts at One Day Weaver

On the second day, students visited the **One Day Weaver Centre**, where they explored the fascinating world of traditional textile making. They experienced the various stages of weaving, from cotton field exploration and cotton packing to spinning and traditional handloom weaving.

Students also witnessed the art of block printing and created their own printed handicrafts. The silk journey introduced them to silk cocoons and the process of silk production, offering valuable insights into India's rich textile heritage, traditional craftsmanship, and sustainable livelihoods.

Learning Beyond the Classroom

The two-day camp was a memorable blend of adventure, education, and recreation. It helped students develop confidence, strengthen interpersonal skills, appreciate traditional Indian crafts, and build lasting friendships.

The camp was truly an enriching experience, reminding us that some of the most meaningful lessons are learned not only in classrooms but also through exploration, discovery, and shared experiences.
