

LKG BLOCK COMMENTARY

July 2022

Date: 01-07-22 to 30-07-22

From the desk of LKG Teachers:

We are going to tell you about the Early Program on “My World in Colours”

The children will realise that colours can be used to express our ideas, describe things and explore secondary colours, they will experiment with colours and learn that two colours can be mixed to make a new colour.

Students will begin by exploring colours through observation and relating them to real life objects from surroundings. Children will begin by mixing the primary colours, YELLOW, BLUE to make secondary colours like GREEN, PURPLE, ORANGE.

During **Theme time**, Students will talk about their daily routines and sequence of events based on their daily routine. They will learn to recognize different colours. Students explore mixing of two colours to create a new colour and engage in activities.

During **language time**, students will learn to scribble, and write standing line, sleeping line slanting line and curves.

Rather than just exploring all the colours together, students explore the different colours gradually They will explore the colours using visuals, stories and rhymes.

At home, Parents can show children objects that are found naturally in these colours like green grass or orange carrot or purple brinjal. This will help them to relate with colours found in environment.

UPCOMING EVENTS :

Class teachers

LKG-A: Ms Lakshmi kumari
