

Beyond the Classroom Teaching

A day out from routine all the four teachers Ms. Radhika, Mr. Jayanth, Ms. Seema Sharma and Ms. Sabeeha set to travel to Dream Valley Resort on August 21st for a Workshop 'Beyond the Classroom Teaching'.

As per the 21st century skills which need to be acquired by the students of this generation, the activities conducted were worthy and could be slowly and steadily adapted in the education system.

It helps the children not to gain knowledge just by reading books, but they can look at the world around them and explore how the system of nature works integrating the subjects.

The workshop was beautifully executed to bring together research and practice.

The prime focus of the workshop was to train a student to adapt to

- Leadership skills
- Collaborative skills and
- Survival skills

Overall It was an enriching experience to learn to teach with a difference.

Mr. Ranjan Biswas and team were the Resource persons.

Regards
Radhika
