

CBSE-NEP Webinar Series 2021-22

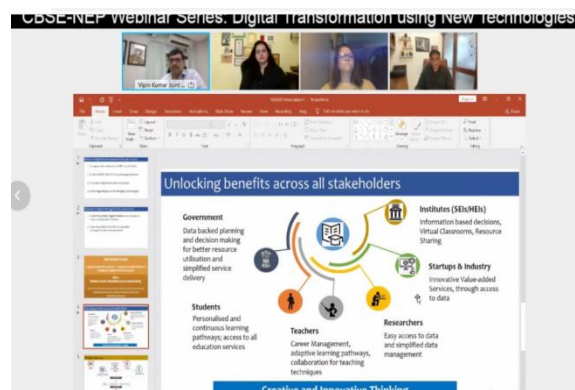

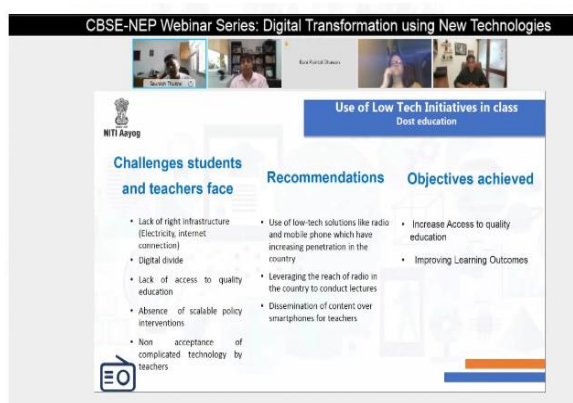

Digital Transformation using Emerging Technologies

As a part of CBSE_NEP webinars, on 11th August, Thursday, a webinar on 'Digital Transformation using Emerging Technologies' topic was organised and it was attended by the IT Dept. of the School.

In his keynote address, Mr. Sh. Vipin Kumar, IAS, Joint Secretary, Ministry of Education pointed out the various hurdles faced by teachers and students during the pandemic and how online education led to the transformation of our learning and teaching scenario. He strongly agreed that there are a few lapses in this system but over and above it paved a way to the new learning environment which is available 24x7 without commuting to schools.

As a moderator, Dr. Biswajit Saha, Director, Skill Education and Training stressed upon the need of skill education which is easily accessible now through online mode.

A few recommendations were made by the keynote speaker and other panellists to reduce the 'digital divide':

- ✓ Using low-tech solutions such as radio and mobile phones
- ✓ Leveraging the reach of radio
- ✓ Dissemination of content over smartphones for teachers,

The session ended at a very positive note and many challenges like non-acceptance of complicated technology by teaching community and lack of scalable policies were also discussed and a few suggestions were made to overcome these by the panellists.
